

Supplemental Products and Services

You can get even more out of your investment in the Work Order Network

Overview

Corrigo offers products and services specifically designed for members of the Work Order Network. These are targeted to your business, built to be easy to use, and seamlessly connected to the Work Order Network. They help you focus on the business instead of the paperwork.

QuickBooks Invoice Import

For QuickBooks users who average over 50 invoices per month on the work order network, this is a valuable time saver. Using this simple and powerful add-on you'll recapture the time you spend re-typing your invoices from QuickBooks into WorkTrack Service Provider. You can import your invoices as soon as they are ready with the push of a button.

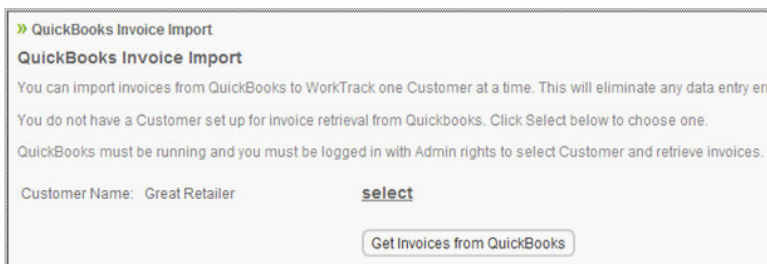

Figure 1. QuickBooks Invoice Import

Eliminate transcription errors. Stop waiting on paperwork. Save companies hours every week. Set up is easy.

WorkTrack Service Management

For companies interested in issuing work orders to their techs directly and taking advantage of a fully integrated Work Order system, WorkTrack Service Management helps you get more work done, get paid faster and do payroll better.

For more information visit <http://provider.worktrack.com> or call 866-326-7744, and we'll be happy to help you find the solution that is right for your business.

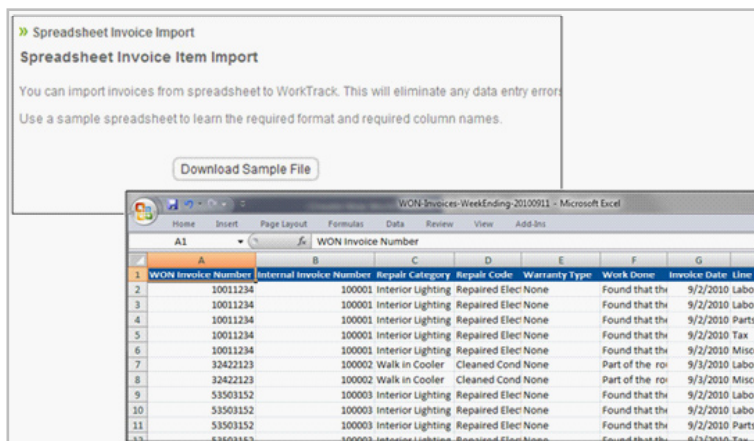

Figure 2. Spreadsheet Bulk Invoice Import

Spreadsheet Bulk Invoice Import

This is a powerful tool for Service Providers who average over 50 invoices per month on the work order network and have the capability to export a formatted spreadsheet from their accounting system. Using this add-on you can complete work orders, import invoice content including repair categories/codes and submit invoices programmatically from a single spreadsheet. This can save you huge amounts of time.

Web Services Access

For companies with their own Service Management systems and access to IT resources, Web Service Access enables a direct connection to the Work Order Network. Service Requests can be retrieved and updated using web services directly. Companies using this add-on can interact with their Work Order Network customer directly from within their existing service management system.

Wireless Work Orders

Everything your guys need to know right on their belts without a clipboard.
